

HOURGLASS - Workout Plan

This is the simple version of the plan: open the app, follow the day shown, watch the form cue, record your weight, and mark complete. Do not turn this into a guessing game.

Week 1 - Curve Creator

Build the pattern. Move clean. Leave one or two reps in reserve.

Day	Focus	Main Work
Monday	Glute Sculpting	Hip thrusts, lunges, kickbacks, abduction, core
Tuesday	Upper + Waist	Rows, presses, planks, carries, controlled core
Wednesday	Low Impact Burn	Incline walk, step-ups, bodyweight circuit
Thursday	Glutes + Hamstrings	RDLs, bridges, curls, thrust variations
Friday	Full Body Finish	Squat pattern, push, pull, core, conditioning

Week 2 - Build Shape

Add control and a little more load where form stays clean.

Day	Focus	Main Work
Monday	Glute Sculpting	Hip thrusts, lunges, kickbacks, abduction, core
Tuesday	Upper + Waist	Rows, presses, planks, carries, controlled core
Wednesday	Low Impact Burn	Incline walk, step-ups, bodyweight circuit
Thursday	Glutes + Hamstrings	RDLs, bridges, curls, thrust variations
Friday	Full Body Finish	Squat pattern, push, pull, core, conditioning

Week 3 - Burn + Shape

Shorter rest and better tempo. The goal is density, not rushing.

Day	Focus	Main Work
Monday	Glute Sculpting	Hip thrusts, lunges, kickbacks, abduction, core
Tuesday	Upper + Waist	Rows, presses, planks, carries, controlled core
Wednesday	Low Impact Burn	Incline walk, step-ups, bodyweight circuit
Thursday	Glutes + Hamstrings	RDLs, bridges, curls, thrust variations
Friday	Full Body Finish	Squat pattern, push, pull, core, conditioning

Week 4 - Progress Check

Repeat key lifts and compare notes. If the weight moved better, progress.

Day	Focus	Main Work
Monday	Glute Sculpting	Hip thrusts, lunges, kickbacks, abduction, core
Tuesday	Upper + Waist	Rows, presses, planks, carries, controlled core
Wednesday	Low Impact Burn	Incline walk, step-ups, bodyweight circuit
Thursday	Glutes + Hamstrings	RDLs, bridges, curls, thrust variations
Friday	Full Body Finish	Squat pattern, push, pull, core, conditioning

Weeks 5-8 - Push Phase

Use the same structure, slightly harder. Quality first, then load.

Day	Focus	Main Work
Monday	Glute Sculpting	Hip thrusts, lunges, kickbacks, abduction, core
Tuesday	Upper + Waist	Rows, presses, planks, carries, controlled core
Wednesday	Low Impact Burn	Incline walk, step-ups, bodyweight circuit
Thursday	Glutes + Hamstrings	RDLs, bridges, curls, thrust variations
Friday	Full Body Finish	Squat pattern, push, pull, core, conditioning

Coach Rules

- If the last two reps are ugly, reduce the weight.
- If you miss a day, do not restart the week. Pick up the next workout.
- Record weights after each main lift. That is how the app learns what to suggest next.
- Mark complete only when the work is actually done.
